Career Profile

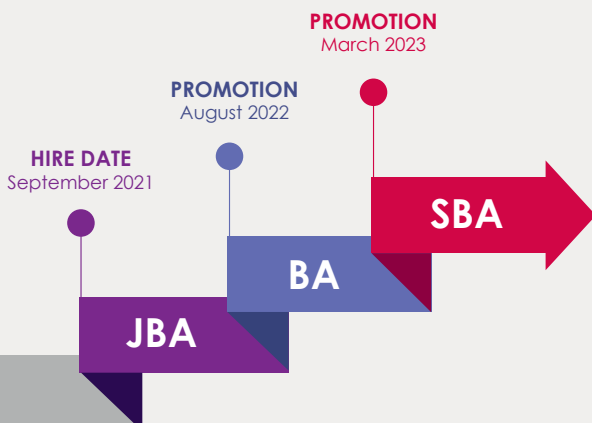

June, MPharm

	Qualification awarding University:	King's College London, UK
	Specialist Area:	Clinical Pharmacy
	Time with Lifescience Dynamics:	1.5 years
	Current role:	Senior Business Analyst

What three words best describe you?

CAREER PROGRESSION

What's one thing we don't know about you?

I have a diploma in classical ballet awarded by the Royal Academy of Dance and was on my university's competitive ballet team.

What is your career high to date?

Following my passions and acting on them by successfully switching careers. My background is as a clinical pharmacist, and I completed my qualification training and worked as a clinical pharmacist at a major teaching hospital in London. Working frontline in one of the busiest hospitals in central London during the peak of the COVID pandemic was so tough but also extremely rewarding. Working in the NHS really provided me with a wealth of experience and an amazing foundation, but I knew that in the long run, I wanted to move away from direct patient care but still wanted to be in the life sciences industry. Making the decision to switch careers was not an easy one but I am proud of myself for believing in my passions, choosing to put myself in an uncomfortable position, and following my gut.

Why have you joined Lifescience Dynamics?

I joined LSD as I wanted to work with the best people in the life sciences consulting industry. Internally, LSD attracts a pool of very amazing talent from different backgrounds and disciplines. Externally, our clients are all top players with great reputations in the industry.

What are the top three things you enjoy about being a member of the Lifescience Dynamics family?

The brilliant, intelligent, and kind people I get to work with daily. The tight-knit, friendly Company culture. Our amazing MYP retreats.

What are you looking forward to in your next step with Lifescience Dynamics?

I am looking forward to further honing my analyst skills as well as picking up more project managing responsibilities so I can further progress in developing as a rounded life sciences consultant.

What would your advice be to someone considering joining the Company?

LSD is a great place to start out your life sciences consulting career as you get hands-on experience from the get-go. The diverse environment makes for great learning and collaboration. Your experiences and your strengths are uniquely yours, so use them to the fullest.
