	Specialist Area:	<b>Biotechnology &amp; Entrepreneurship</b>
	Time with Lifescience Dynamics:	<b>4 years</b>
	Current role:	<b>Consultant</b>

### What three words best describe you?

### CAREER PROGRESSION

### What's one thing we don't know about you?

Passion for all things personal wellness; including daily 6am gym workouts, swimming, meditation, and intermittent fasting.

### What is your career high to date?

Conducting a Master Class workshop at Pharma CI US, I addressed over 40 pharmaceutical CI professionals, sharing insights on estimating regulatory timelines for drug approvals. The response was overwhelmingly positive, with attendees expressing admiration for the content's depth and clarity. For the remaining two conference days, individuals approached our booth to extend congratulations and discuss the workshop's impact. It was immensely gratifying to witness such an outpouring of engagement following the presentation and affirmed the value that I could bring to the pharmaceutical CI community.

### Why have you joined Lifescience Dynamics?

Following the setback of my unsuccessful start-up, my desire to apply my master's degree and contribute to healthcare led me to consider a transition into pharmaceutical consulting. Lifescience Dynamics stood out to me for several reasons:

- A pervasive family culture, which was voiced by individuals at all levels, from junior members to senior consultants and the CEO.
- A focus on competitive intelligence and market research, aligning with my master's thesis and offering an opportunity for specialization.
- The exciting prospect of staying apprised of the latest advancements in drug development and the pharmaceutical industry.

### What are the top three things you enjoy about being a member of the Lifescience Dynamics family?

I may be biased but I do not think I am wrong in saying that Lifescience Dynamics offers the best work-life balance within consulting, which allows me to maintain the things that I love outside of work. Additionally, being surrounded by intellectually-driven colleagues provide a stimulating work environment where ideas are exchanged, and learning is a constant. The continuous challenges presented in my role contribute to personal and professional growth, making each day dynamic and rewarding.

### What are you looking forward to in your next step with Lifescience Dynamics?

I look forward to mastering the art of leading a discussion, whether it be with clients or internally with my team. A great client meeting can keep clients happy and expand our opportunities for business, while internal discussion can galvanize analysts and help foster a positive working environment. I also look forward to line managing analysts to perfect my mentorship style and taking on more complex projects in order to stretch my management skills.

### What would your advice be to someone considering joining the Company?

Don't be afraid of jumping head first into consulting, but make sure you prioritize your work-life balance because that is how you will ensure long-term career satisfaction and well-being.
