Business Analyst

What three words best describe you?

What's one thing we don't know about you?

Before moving to the UK for my GCSEs and A-levels, I once dreamed of becoming a professional violinist and pianist. I played the viola for around nine years and the piano for thirteen. While I no longer play actively, my love for music remains strong—I regularly attend musicals, orchestras, and band performances. Most recently, I had the pleasure of experiencing a Candlelight concert in London, which was truly unforgettable.

CAREER PROGRESSION

What is your career high to date?

My career high to date has been delivering multiple readouts to our client's internal stakeholders—experts in the field—where I had the privilege of leading the project. Throughout this experience, I not only managed the project but also provided valuable insights and updates directly to stakeholders. Our efforts and analysis were fully recognized, contributing to the project's renewal. Additionally, I had the opportunity to meet stakeholders in person at major conferences such as ASCO and ESMO. This experience significantly broadened my professional skills and strengthened my confidence.

Why have you joined Lifescience Dynamics?

During my MSc at UCL, I had the opportunity to complete a three-month internship at Lifescience Dynamics as part of my dissertation project. When the consulting team visited UCL to introduce the internship program, I saw it as an exciting entry point into pharma consultancy. The experience not only deepened my understanding of the drug commercialization process but also gave me valuable insight into the nature of consultancy work.

During my internship, I was able to contribute meaningfully to client deliverables, and my work was recognized both internally and externally, ultimately leading to a full-time offer. However, it wasn't just the work itself that drew me in—it was also the supportive and collaborative company culture, the dynamic team, and the engaging office environment. These factors made my decision to join Lifescience Dynamics an easy one, and I am eager to continue growing alongside the Company.

What are the top three things you enjoy about being a member of the Lifescience Dynamics family?

Friendly Atmosphere – Lifescience Dynamics fosters an inclusive and welcoming environment, making it a great place to work and grow both professionally and personally

Learning Opportunities – Beyond day-to-day work, the company provides unique opportunities for personal and professional development through various tools, resources, and mentorship

Impactful Work – The insights and solutions we provide to the pharmaceutical industry play a crucial role in shaping strategic decisions, ultimately benefiting both pharmaceutical companies and the broader medical field

What are you looking forward to in your next step with Lifescience Dynamics?

I am eager to expand my responsibilities within projects, moving beyond leading analysis and deliverables to managing client expectations, team coordination, and business development activities. This growth will not only help me solidify my expertise in pharmaceutical consulting but also enable me to develop into a well-rounded professional, both in my career and personal development.

What would your advice be to someone considering joining the Company?

Lifescience Dynamics is a company that provides excellent opportunities to develop and expand your skill set while making a meaningful impact on the pharmaceutical industry. With a comprehensive training program led by industry experts, employees gain exposure across a wide range of therapeutic areas. The supportive and friendly work environment fosters continuous learning, allowing individuals to maximize their potential and grow both professionally and personally.
